

THE WORLD OVER

ANCIENT CABIN IS DISCOVERED

MAN HUNT CONCLUDED IN SASK.

FRENCH SUBMARINE GOES DOWN

Lord ROTHERMERE FAVORS DUTY

English newspapers of 1866, proclaiming the date of occupancy, discovered in an old cabin, the former home of some gold seeker and prospector, has been found on Wild Horse River, near Cranbrook, B.C. The remnants of an English shanty, a sluice box and a flint lock for a gun, were also found in the cabin.

With the finding of the dead body of William Miller, third of a trio of men who shot to death Corporal Dill of the Royal Canadian Mounted Police, Saskatchewan historic man hunt has ended. Trapped in a relentless circle of armed police and farmers, Miller, already wounded in the battle, took his own life rather than suffer his fate at the hands of the authorities. The younger brother, Mike and William Karak, were rounded up previously and must face charges in connection with the death of the Police Corporal. The younger brother Mike, 18 years of age, was arrested on a charge location when police came upon him sleeping peacefully under a tree.

CHERBOURG, France.—The French submarine, Prometeus, plunged without warning under the waves off Cherbourg harbour while on a trial manoeuvre recently, taking down at least 66 men in 100 feet of water, seven miles north of Cape Lizard. Nine members of the crew, including Lieut. du Mas, the ship's commander, were saved when they were hauled from the deck into the sea by the lurch of the vessel in its unexpected drive.

Efforts are being made to raise the submarine, which has only been in service two years, and was said to be in perfect working order.

Lord Rothermere, one of the World's greatest publishers, is in Calgary this week and officially opened the Calgary Exhibition and Stampede on Monday. Commenting on the Imperial Conference, to be held in Ottawa, he said: "It is fervently hoped that as an outcome of the Ottawa Conference, Great Britain will place a duty of 25 to 35 per cent on all foreign canned meats entering its territory, thus placing at the disposal of the producers and stockmen of Alberta a free market of almost unlimited requirements. With this accomplished I am confident, when I next visit Alberta, that I shall see all its industries moving steadily forward to prosperity."

CARBON WINS AND LOSES AT LAWN TENNIS

Three Hills Junior Win From Carbon. The Juniors of the Carbon Lawn Tennis Club journeyed to Three Hills last Sunday July 10, and played a return match with the Three Hills Juniors. The result was a win for Three Hills by four events to two. The Three Hills boys played well and thoroughly deserved their win.

The Three Hills courts are white clay and are in splendid shape. They are a credit to the organization of this town.

The Carbon boys have an abili that were playing boys much older than themselves and also that they were somewhat handicapped by the short run back at the Three Hills courts, this run back being only about half the length as specified in the regulations.

The following are the results and scores:

Boys' Singles—N. Nash of Carbon defeated R. Murray of Three Hills 6-2, 6-4. R. Wise of Carbon defeated N. Nash of Three Hills 6-2, 6-4. M. Kaldheiser of Three Hills defeated H. Wise of Carbon 6-2, 6-4. A. Swarden of Three Hills defeated Frank Poxon of Carbon 6-2, 6-3.

Boys' Doubles—R. Murray and W. Witter of Three Hills defeated N. Nash and R. Wise of Carbon 6-2, 6-4. M. Kaldheiser and A. Swarden of Three Hills defeated H. Wise and F. Poxon of Carbon 6-2, 6-4.

Carbon defeated Acme at Sports Day.

In connection with the Acme Sports held on Friday, July 8, a tennis match was arranged between the Carbon and Acme Lawn Tennis Clubs, four senior and four junior events being played. The result was a win for Carbon by five sets to three.

The following are the results and scores:

Mary's Singles—W. Edwards of Carbon defeated W. Poxon of Acme 6-4, 6-1. J. Taylor of Acme defeated R. Ramsey of Carbon 6-2, 6-4.

Boys' Singles—N. Nash of Carbon defeated G. Young of Acme 6-2, 6-4. R. Wise of Carbon defeated Gordon Reddick of Acme 6-2, 6-2.

Mary's Doubles—W. Edwards and R. Ramsey of Carbon defeated G. Young and R. Moore of Acme 6-1, 6-0. J. Taylor and W. Edwards of Carbon defeated H. Edwards and G. Ramsey of Carbon 6-4, 6-2.

Mary's Doubles—N. Nash and R. Wise of Carbon defeated J. Weicker and C. Reddick of Acme 6-0, 6-0.

J. Weicker and G. Reddick of Acme defeated H. Wise and F. Poxon of Carbon 6-2, 6-1.

HUXLEY TO GRAINGER U.F.A. TO HANDLE BINDER TWINE

The next meeting of the Huxley to Grainger District Association U.F.A. will be held in Alumni school near Ghost Pine, nine miles east of Three Hills, on Wednesday, July 20th. Mr. Irvine M.P. has been asked to address the meeting.

Negotiations have been in progress for the handling of twine by this association this year, and at this meeting it is expected that all arrangements for this undertaking will be completed.

PEERLESS MINE STRIKES A GOOD SEAM OF COAL

Work is steadily progressing on the new mine of the Peerless Carbon Collieries, situated one mile west of the C.P.R. station. Recently this mine completed driving the slope and shaft, and they are now getting out coal, which is being offered for sale to the public. The mine has been in operation for some time, and as soon as screens are installed all sizes of coal will be available.

MODERN EQUIPMENT ADDED

Work is steadily progressing on the new mine of the Peerless Carbon Collieries, situated one mile west of the C.P.R. station. Recently this mine completed driving the slope and shaft, and they are now getting out coal, which is being offered for sale to the public. The mine has been in operation for some time, and as soon as screens are installed all sizes of coal will be available.

Shaft and Slope Completed; Getting Out Coal Now; Machines Being Installed

Work is steadily progressing on the new mine of the Peerless Carbon Collieries, situated one mile west of the C.P.R. station. Recently this mine completed driving the slope and shaft, and they are now getting out coal, which is being offered for sale to the public. The mine has been in operation for some time, and as soon as screens are installed all sizes of coal will be available.

It is expected that the coal cutting machines will be installed in the mine within the next week and when this takes place development operations will be rapid and considerable coal marketed.

Recently the Peerless purchased an electric hoist from Jesse Gouge and this is being installed. The tipple is rapidly nearing completion and taking all things into consideration everything is working in line with the plans of the operators and it will not be long before coal will be shipped.

Local Conditions at Mine Sites

Living conditions at the new Peerless mine for its workers will be much better than at the old place. Each house has a small plot and room is reserved for a garden. A well has been provided for every five houses and water has been obtained at ten feet. It is said that each householder must have a rental charge of property of \$1 monthly, and electric light will be provided to miners at around \$1 a month.

Science 59; Geometry 32; Algebra 65.

Karl Schuler, John Neher, Martin Betcher, Carlson, and Rev. F. A. Miller of Edmonton, returned Monday evening from Yukon, where they were attending the Baptist convention.

M. R. Maybank and others of Edmonton on Monday to take in the druggist convention at Saskatoon.

Farmers Report that Beet Webworm are Prevalent; Means to Combat Pests

BET WEBWORMS ARE DOING CONSIDERABLE DAMAGE TO GARDEN

PRODUCE IN DISTRICT SOUTH. METHODS OF CONTROL AS OUTLINED BY DEPARTMENT. TWO GENERATIONS, JULY 4 & AUGUST.

The Beet Webworm, which has been doing considerable damage in the south, is now in the district. It has been active since the 1st of July, and has done considerable damage to the beet crop in some cases where gardens have been cleaned out. In the town itself, while some damage has been done, and in some cases where gardens have been cleaned out, the worms have not taken to the gardens as yet.

The webworms are exceedingly numerous this year and the following information has been issued by R.H. Strickland, of the University of Alberta.

Every day our mail contains requests for information regarding the habits of the small light-brown moth that is so apparent everywhere about the sides of roads in almost every district in the Province of Alberta.

Since, if the season is favorable to them, many people will soon be encountered the caterpillars from the eggs that have been laid by the moths. It is as well that everyone familiarize himself at once with their appearance, habits and control.

The moths have laid enormous numbers of eggs on the leaves of various plants, particularly those of weeds such as lamb's quarters. From these will hatch small greenish-yellow caterpillars with conspicuous black stripes and circles on their bodies. When they are very numerous, and there is every indication that they will be extremely numerous, this year, they soon devour all the plants on which the eggs were laid. They then move across country in dense armies in search of more food.

Food of Beet Webworms.

Fortunately for grain producers, beet webworms will not eat wheat. They hardly touch oats or barley. When an

army of them passes through a grain field, they have even been known to injure their line of march. Whatever harm they do elsewhere they more than offset this damage by thoroughly cleaning the gardens of weeds.

As for fruit and garden crops they are, however, general feeders. They chew the leaves of many beet webworms from the fact that an army which passes through a sugar beet field leaves nothing but ruin in the wake. Peas, clover, alfalfa and asparagus are similarly eaten to the ground.

Possibly it is gardens that suffer most severely. Particularly in garden where there is a lot of them, an army makes a clean sweep of everything, with the possible exception of some. Fortunately, they do not eat potatoes very readily when any food is available.

Control Measures.

When army of webworms starts to march, nothing will deter them from continuing along the line they have chosen. It is as well that everyone familiarize himself at once with their appearance, habits and control.

When an army of webworms starts to march, nothing will deter them from continuing along the line they have chosen. It is as well that everyone familiarize himself at once with their appearance, habits and control.

Ourselves.

Brace Barton, the well known author and magazine writer, has proposed the toast: "To the only folks who can make us or break us—To Ourselves." And he quotes the saying of Carlyle: "The world being saved will not save us; nor the world being lost destroy us. We should look to ourselves."

The truth of these statements, differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is actually down and out, defeated, unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity; more people fall to grips and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unsolvable problems.

It is then people begin to call upon latent powers they possess. William James, in his essay on "Vital Reserves," pointed out that underneath our daily store of strength and courage, all of us have reserves that are tapped only by emergency. We are all alive, under the test, to surprise ourselves with an unsuspected capacity to be and do more.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is ours to employ now. The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bedridden wife not only to support but to care for. He has not an opportunity prior to losing his position received only a small salary. Did he despair and call upon the Government to put him "on relief"? Not a bit of it! He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small painting jobs. Then at Christmas time he got work soliciting orders on a commission basis. When spring came he hunted up garden work to do. Thus he keeps going. He is seldom idle because he is willing to take on any kind of job, no matter how humble, and when you meet him he always has a new job to tell. He goes whistling on his way, morning to accept Government or municipal relief, always looking forward to better days that must inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before; he has maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. Nevertheless he has and is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us with which we have been endowed. In a word, we have not faith in ourselves and without that faith anything that others may do for us will fall far short. Such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been buffeted about; we may be gasping, but if we are strong of heart and keep on we will get our "second wind." A race is never lost until it is over. We must keep on to win until the tape at the finishing line is definitely broken. Our success or failure depends, not on the other fellow, but on ourselves.

Canada Now Only Week-End Journey From England

Canada is now only a "week-end" journey from England, thanks to the record-breaking crossing of the Atlantic by the C.P.'s "Empress of Britain," says Vincent Rothemann, famous British newspaper magnate. Vincent Rothemann declared that the interval between the time the "Empress of Britain" passed Bishop's Rock lighthouse, and the time she reached the entrance to the Strait of Belle Isle, was only 73 hours and 53 minutes. "The passage of the north Atlantic was made with only two nights spent out of sight of land," declared Vincent Rothemann, "and the journey has been through smooth land-locked waters."

An Imposing Monument

Prince Of Wales Will Dedicate War Memorial In France

One of the most imposing war memorials on French soil is that which is to be dedicated to the fallen of Wales at Thiepval, on the Somme, next March. This monument, which is nearing completion, will be composed of triangular arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 73,367 British soldiers, N.C.O.'s and men.

The average annual income of physicians in the United States, as revealed by an American Medical Association survey, is \$9,674.

All Her Children Were Troubled With Diarrhoea

"Mr. J. B. McKee, R.R. 1, Endless, B.C., writes:—'Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Wild Strawberry Syrup. I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I feel it the only use that children as easily and quickly.'"

Right Up To-Date

The new LaFrance place which France is colonizing shows how modern that country is. "Marraine," as the girl on the coin is called has been had long hair.

It is said that more persons disappear from Paris than from any other city in the world. About 520 were reported missing every day in 1931.

Modern conveniences are being introduced into small towns of Albania.

Established For Centuries

History Of Many English Business Firms Is Interesting

Among the historic business firms of England is one which claims existence when the Romans despoiled the medieval London. This is Hedges and Butler, wine merchants, whose origin is shrouded in the mists of time. It is expected, in a gigantic trap, that the Duke of Wellington, V. E. Clonstone, and Lord Bessborough among their customers. Yet another is G. W. Scott and Sons Limited, who made hoops for the dresses of the fashionable ladies in the days of Queen Anne and wicker frames for the beaks of the Guards at Waterloo. Founded in 1680, Birch and Co. have since provided all the banquets for the City Corporation, and for 250 years have fed every crowned head and important man in Europe. The business remains famous for turtle soup and punch made from age-old recipes, and the fine window of the original shop now reposes in the London Museum. Also founded in 1680, Grosvenor, Chater and Co., were the first stationers to the Bank of England. Queen Anne, a famous gourmet, liked the relishes made by Croasse and Blackwell, into which firm Napoleon's chief, Quatrecas, entered, and invented the pickle, Piccalilli. In 1783, it is interesting to note now of the tea duty, which was then reimposed, Mr. Richard Twining, of R. Twining and Co., the tea merchants, was called in by Pitt to discuss the removal of duties on tea. A step which was taken. Two hundred and twenty-two years ago the Sun of the East India Company, which in 10 years issued 20,000 policies, insuring about £10,000,000, an enormous sum in those days. Telescopes made by Dollond of London, and when you visit Althorp, were used by Nelson, Wellington and Napoleon. To C. T. Brock and Co., the fireworks makers, who have brought the distinction of carrying on an illegal trade for 155 years, firework making not being actually legalized till 1875.

High Tariff Walls

Action Of U.S. Forces A Severe Blow To Canadian Agriculture

The exports from Canada to the United States of principal commodities, such as are produced on Canadian farms, or manufactured directly from such farm products, during the month of May amounted in value to \$590,195, as compared with \$3,237,340 in May, 1930, and \$8,691,898 in May, 1929, according to the Dominion Bureau of Statistics.

The high tariff walls erected by the United States, culminating in the Hawley-Smoot act in June, 1930, were a severe blow to Canadian agriculture, making the export to that country of many commodities practically impossible.

During the eleven months ending May, 1932, the export of such commodities to the United States totalled \$8,632,428, as compared with \$4,078,190 in the same period of 1929-30, and \$17,490,262 in the eleven months ending May, 1921.

With a duty of 42 cents per bushel on wheat, the export of Canada's wheat to the United States declined from 300,120 in eleven months of the crop year 1929-30, to 22,690,714 in 1931-32. Three cents per pound on beef cattle has caused a drop from 21,182,924 to 461,745.

Three dollars per head on sheep brought the export down from \$1,666,213 to \$826. Butting at 14 cents per pound fell from \$2,299,221 to \$145,946, flaxseed at 65 cents per bushel from \$1,763,331 to \$973,709, flaxseed at 75 cents per 100 pounds from \$6,557,031 in eleven months of 1929-30 to \$459,449, hay at \$5 per ton from \$2,369,295 to \$115,979, and corn at lowered prices have also had some effect upon the values.

Internally and Externally It Is Good.—The crowning glory of Dr. Thomas' Eucalypti Oil is that it can be used internally for many complaints, as well as externally. For the throat, chest, colds, and many other ailments, it is a most valuable remedy. A bottle of it costs little and there is no loss in always having it at hand.

Evidently Not Known

The case came before a London court the other day of a man who "with an income of nearly £3,000 a year" was not a friend in the world. It cannot have been generally known that he had an income of nearly £3,000 a year.

And now it is reported crocodiles do not cry. Next thing to know is that someone will muster enough courage to declare there is no such thing as a thing as a weeping willow.

Food loses no nutritional value in canning, scientific experiments indicate.

Using 'Planes in Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore., plans the mightiest wild horse drive—from the air. Three airplanes will dip over the plateaus and passes, set the wild lands running, head them at the turns and finally stampede 2,000 of the beasts. It is expected, in a gigantic trap, that the Duke of Wellington, V. E. Clonstone, and Lord Bessborough among their customers. Yet another is G. W. Scott and Sons Limited, who made hoops for the dresses of the fashionable ladies in the days of Queen Anne and wicker frames for the beaks of the Guards at Waterloo. Founded in 1680, Birch and Co. have since provided all the banquets for the City Corporation, and for 250 years have fed every crowned head and important man in Europe. The business remains famous for turtle soup and punch made from age-old recipes, and the fine window of the original shop now reposes in the London Museum. Also founded in 1680, Grosvenor, Chater and Co., were the first stationers to the Bank of England. Queen Anne, a famous gourmet, liked the relishes made by Croasse and Blackwell, into which firm Napoleon's chief, Quatrecas, entered, and invented the pickle, Piccalilli. In 1783, it is interesting to note now of the tea duty, which was then reimposed, Mr. Richard Twining, of R. Twining and Co., the tea merchants, was called in by Pitt to discuss the removal of duties on tea. A step which was taken. Two hundred and twenty-two years ago the Sun of the East India Company, which in 10 years issued 20,000 policies, insuring about £10,000,000, an enormous sum in those days. Telescopes made by Dollond of London, and when you visit Althorp, were used by Nelson, Wellington and Napoleon. To C. T. Brock and Co., the fireworks makers, who have brought the distinction of carrying on an illegal trade for 155 years, firework making not being actually legalized till 1875.

Musket Has Its Use

Possibility It May Be Manufactured Into Wall Board

Covers, the moss-like substance that makes thousands of miles of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade of the P.E.I. Maritime, says that a trainload of musket being shipped to Brampton, Ontario, for use in the manufacture of wall board, is sitting in the midst of millions of tons of musket, long believed valueless, officials of the board were asked to inquire into the possibility of buying a dozen carloads or so. Negotiations now under way for shipment and the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will relieve the sufferer. It is a powerful inhalant that reaches the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do the thousands of grateful users, you would be a package in your home tonight. Try it.

Treachorous Police Dogs

Bringing These Animals Into Canada Looks Like Mistake

The Stratford Beacon-Herald in connection with a case of a lad of six being bitten in Toronto by a police dog, observes that breeders of dogs are agreed that it was a mistake to bring this dog to Canada. It has not the background and tradition of the Collie, the bulldog, the setter, St. Bernard, Newfoundland or any of the other well-known breeds of dogs to which we are accustomed. The police dog is a wild animal, and treacherous in the sense that he cannot be trusted. He is a bit of a wild animal. The breeding of these dogs should be discouraged, especially for city life.

The Man Who Walls

Cannot Afford To Relax Vigilance For

It must be admitted that the pedestrian today has a grievance. He must go about his lawful occupations, if society is to take to him, and he must frequent the streets and roads. If he is nowadays condemned to do so at the peril of being killed or maimed if he should be guilty of error of judgment or one lapse of vigilance. He must live in a jeopardy comparable to that of the troops in the front-line trenches during the War—Morning Post, London, England.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Two poems and a complete story, including altogether 8,100 words, have just been written on the two sides of an ordinary postcard. The record feat was performed by a resident of Munich, Germany.

It cost nearly \$12,000,000 to supply London with water, in the last 12 months.

Sick From Heat

"Baby's Own Tablets are excellent for children's summer complaints," writes Mr. E. C. Coates, Brantford, Ont. "Best of all children's remedies for summer complaints," writes Mr. E. C. Coates.

Walker, Thomas' Eucalypti Oil, for the throat, chest, colds, and many other ailments, it is a most valuable remedy. A bottle of it costs little and there is no loss in always having it at hand.

Food loses no nutritional value in canning, scientific experiments indicate.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful notation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased resort to the Canadian borrowers to the London money market during the current period of financial strain and unsettled exchanges," says the New York Herald-Tribune.

The paper refers to the placing of British Columbia's \$1,500,000 of 5% issue in London in May, which was quickly oversubscribed at 99, and of \$1,000,000 Alberta 5% recently at 98½.

"The new trend," says the paper, "is somewhat of a tribute to the London new issues market, which recovered its pulse last December.

"It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually re-established on a parity with that of the United States, notwithstanding the present discount of nearly 13 per cent. on Montreal funds in New York. The close inter-relationship of United States and Canadian business interests, and the large aggregate of Canadian goods and raw materials in the country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be sought to achieve or maintain in a normal world.

"It is accepted here that the Canadian borrowing in London had the tacit approval of the highest banking authorities in England.

"This assumption is justified, since the effect on the exchange against the dollar has been to depress the British currency unit in terms of the United States dollar, while a favorable effect will be exerted on the Canadian unit in terms of the dollar.

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

Sounds Reasonable

Establishing City Man On Farm

A prominent citizen of Pennsylvania, realizing that unemployed city workers have no means to establish themselves in the country, proposes that the State should finance them in the purchase of farms, stocking them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be welcome to a genuine "back-to-the-land" man who has been brought up in the country, but how can it benefit the man who has never known of life outside a city? He couldn't tell a couldn't tell a horse's crupper from its headstall, he is helpless when he seats himself on a milking stool at a cow's flank, he has the vaguest idea of none at all as to the proper feeding and care of roves. Even the comparatively simple procedure of keeping a flock of poultry in good fettle is Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty-parlor or a high-class specialty shop.

Exports of beef from Alberta in 1931 totalled 100,000 pounds, according to the annual report of the Provincial Livestock Commissioner.

The United States imported 254,000 pounds of garlic last year.

"I believe all men are stupid."
"Oh, no. Some remain bachelors!"

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton as General Passenger Agent C.P.R.

George E. Carter, Assistant General Passenger Agent, Canadian Pacific Railway, is appointed General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to an announcement by R. O. McNeill, Assistant General Passenger Traffic Manager. He succeeds the late George A. Walton, who died on the "Empress of Australia," at sea, on May 18. The position of Assistant General Passenger Agent now held by Mr. Carter will not be filled. This decision was reached in view of the need of economy during current business conditions, and reduced the number of Assistant General Passenger Agents to three.

Mr. Carter's promotion to the highest position in the Passenger Department, follows a career already marked by steady advancement. He was formerly in the company as a stenographer in the Passenger Department at Saint John, N.B., on September 29, 1914. Shortly thereafter he enlisted for Overseas Service, and was wounded on the Western front with the first Canadian Machine Gun Battalion. He subsequently became a member of the world famous Princess Patricia's character of his service with that unit winning him a commission in the Imperial Army, from which he afterwards transferred to the Canadian Corps.

Returning from Overseas at the close of the War, he re-entered the Passenger Department of the Canadian Pacific at Saint John, N.B., and steadily worked his way upward through the ranks. He was transferred to posts of increasing responsibility at Quebec, and in turn made Chief Clerk in the New York and Montreal offices of the Passenger Department. Mr. Carter also made a special instructional trip to Europe in co-operation with the Canadian Pacific Steamships.

For his part, Assistant General Passenger Agent at Saint John on December 10, 1928, and Assistant General Passenger Agent in Montreal on May 1st, 1930. He is a member of the Traffic Club of Montreal, and of the Railway Club.

Had the Makings

The tourist rushed into the village shop. "I want a quart of oil, some petrol, a couple of speaking plugs, a five-gallon paraffin can, and four pie tins."

"All right," replied the enterprising clerk, "you can assemble 'em in the back room if you want 'em."

Tony Sarg, artist and puppet-master, lived as a boy in an English village which had no toy shop or store that sold gimcracks. The situation forced Sarg to make his own.

CANADIAN-UNITED STATES PEACE PARK DEDICATED

These photographs were taken when the Waterton-Glacier International Peace Park was dedicated under authority of the Canadian Government and United States Congress as a monument to 117 years of enduring peace and good-will between the two nations. Sir Charles A. Mander of England delivered the dedicatory address at the colorful ceremony which was held at the top, centre, clapping hands of E. T. Scoyen (left), superintendent of Waterton Lakes National Park, and H. Knight (right), superintendent of Waterton Lakes National Park. The Peace park lies originally with the Waterton Club of Cardston, Alberta, and was sponsored by the Rotary Club of Canada and the United States. The lower photograph shows Chief Two Guns White Calf welcoming Lady Mander into the Blackfoot tribe as Princess Shining Star Woman (Kos-kai-Na-Si-Ya-Ne), following the ceremonies of dedication.

Weed Menace

Effective Method Of Securing A Clean Seed Crop

This is the time of the year when the rogues of the seed crop should be carefully watched—among the most troublesome of which are the weeds. Shoulder Campion, Catch Fly, Couch Grass, Rib Grass, Ragweed, Oxyechlos and Perennial Sow Thistle—and only by effective pulling method can the best quality of seed crop be secured. As the Dominion Seed Branch points out, growers should police their fields carefully and be prepared to resort to liberal roguing where necessary in order to ensure that their seed crop will be free from impurities which often render otherwise good seed of no market value whatever. Roguing, or pulling weeds by hand, before they have gone to seed, is the most effective method of making sure of securing a clean seed crop.

Expedition Into North

May Attempt To Locate Rich Gold and Silver Properties

Captain James C. Critchell-Bullock of Vancouver, companion of the late John Horby during his wanderings in the sub-arctic barrens of the Northwest Territories, may lead an expedition into the north in an attempt to locate rich gold, silver and radium properties.

"During his wanderings in the barrens he made many other important discoveries, and before he died he turned over to me most of his samples, his diaries and his maps."

One of these samples, assayed recently in Vancouver, shows values of \$136,000 to the ton in free gold, Captain Critchell-Bullock said.

Prepared For Emergency

Grave Ready For Lighthouse Keeper

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he has a grave ready waiting for him. He knows that the "light" is all-important and another keeper could not take time to dig him a grave. He also knows that because of the heat he will inhabit his final rock-hewn dwelling before sundown in the day he dies.

This novel "death insurance" scheme was explained in an interview by R. H. Sawyer, resident engineer of the Imperial Lighthouse Service, on a tour through the islands. He is in charge of the 12 Imperial Government light-houses of the Bahamas.

A Berlin inventor has perfected a projector for throwing advertisements on mountain sides.

The United States and China produce the largest amount of poultry.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Requires Team Work

If Every Person Was Careful Fewer Accidents Would Occur

Last year 271 people were killed by motor vehicles in Ontario; 241 people lost their lives by drowning and there were 204 deaths caused by falls.

That makes a total of 1,278 lives that were snuffed out by what might correctly be called preventable accidents, or what in plain speech would be called carelessness or recklessness.

What that total will be this year, of course, remains in the lap of the gods, but judging by the fatalities already reported, it will contain a greater rather than a lesser number, since people are prepared to give greater thought and consideration to this matter.

Schools are closed for the holidays and thousands of children are free, too many of them, to roam at their own sweet will. Will anything serious happen to them?

Surely it will, unless the parents and older people force into their minds the absolute necessity of being careful on the streets, on the roads, at the swimming hole and at other places near to the heart of childhood.

But all the fatalities will not fall among the children, and very few will be caused by them. One can rest assured of that fact.

What about the man or the woman who drives at thirty or forty miles an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading to and from those towns? Are they trying to prevent accidents or have they even a thought of the danger in their minds?

Contrary to a very general belief it isn't always the other fellow who is inviting an accident. Accidents have a way of happening in all places, not just in one, and there is no one cause for them, but many.

If taking a little more time and being a little more careful would help to reduce this amazing total of preventable accidents, is it not the duty of every man and every woman to give this time and care?

Hundred Acres Of Roses

Two New Varieties Yearly Is Twenty-Bush Gardeners' Record

Jan Boehm, in southwest Bohemia, was but little known to the outside world pre-war days. Only the antiquarian, interested in its late Gothic church, or the tourist informed of its delightful old castle site in the midst of a great and lovely park, would think it worth while to drop off there before passing on to the larger and historically more interesting towns of Bohemia. But there has been a change. Jan Boehm is a continuous experimenter, and his results are eagerly followed by experts in this part of Europe. He palaces upon the market new roses each year. Some of his recent introductions include the Masaryk Jubilee rose, the "Bozema Nemcova," named after a famous Czech novelist of the nineteenth century and which is described as "a rose without a thorn," a "Briand-Panepure" and a "Kraus Ustavka" rose of two colors. In addition to his own specimens, Boehm grows all kinds of roses, German, French, English and such. He has a total of 1,300 feet above sea level and is exposed to the sharp winds of the Bohemian Forest would have suggested to a less daring man that this was an impossible spot in which to cultivate roses. What has actually happened is that Boehm has produced roses which are of a hardy sort, inclined to cold and well able to stand rough climate—Christian Science Monitor.

Keeps Business Moving

The head of one of the largest firms of cereal manufacturers announces that it is adding a cool million dollars to its advertising appropriation for the current year. The bulk of this appropriation will be for the new magazines. And some people operating much smaller concerns still persist in thinking that advertising does not pay.

Raw silk exported from Japan last year weighed nearly 20 per cent. more than the 1930 shipments.

Professor Georges Le Danois of the French Sea Fisheries Bureau says

"there is no such thing as the Gulf Stream." This, says the New York Times, is his ultimatum. He hopes "that this categorical statement will put an end to the conjectures inspired by reports concerning the inaccuracy of the river in the North Atlantic."

The suppression of the Gulf Stream by the eminent French oceanographer is a hard blow to romance. Nothing like it has been reported since grim science abolished the Sargasso Sea of adventure tales and condemned to death all those interesting colonies of hopelessly pent voyagers that were held captive in its entangling web. The Sargasso Sea has a flora and a fauna of its own, each as rich as the popular imagination; its human population was so diversified as the circumstances set by the story teller required.

The Gulf Stream reminds us that the Gulf Stream plays a different but not less interesting part in story. It is responsible for the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe. When strange fish appear, the Gulf Stream brings with it a familiar fish disappear, the Gulf Stream takes them away. Outside the Gulf Stream, the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe are strangely persistent. It is so unimportant that it refuses to be guided by the currents' reports—the principal function of the Gulf Stream is to change its course. Not a season passes in which its divergences are not recorded everywhere except on the official charts.

It is a fortunate thing that Professor Le Danois did not revoke the Gulf Stream from its duties. He would have been Ambassador to France. Poor Richard was a firm believer in the great current, and he would have stood up for it. Even now there are those who, despite the proximity of the Gulf Stream, are so glibly convinced that it is a mere illusion. Perhaps it was merely in recess when Professor Le Danois looked at the place where it should have been.

Tariff Pleasantries

U.S. Attitude Puts An End To Possibility Of Neighborly Trade

Colonel W. L. McGregor, president of the Canadian Chamber of Commerce, got a few letters off his chest and on to the needs of the American Chamber of Commerce in convention assembled at San Francisco. Referring to tariff pleasantries between Canada and the United States, he says, "right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Furthermore, the newly threatened restrictions upon Canadian lumber and copper exports come in for rough handling. It is not much good trying to do business with a people who appear unwilling to buy from us, although they sell us one-quarter of their exports, though the colonel, in the classic phrase, he is not arguing with the Americans; he is just telling them. Montreal Star.

Bobby: "Daddy, a boy at school told me I looked just like you."

Dad (proudly): "And what did you say?"

Bobby: "Nothin'. He was bigger 'n me."

City traffic officials of Tokyo, Japan, are trying to find a way to decrease the great number of collisions between bicycles and automobiles.

Diamonds never occur in mass formation, always being found in single crystals.

The flying tank is a new fighting machine.

"Oh, I have forgotten my handkerchief. John, just run up and fetch it before the train comes in!"—Sondagsbladet-Slotts, Stockholm.

To Protect Industry

Ask For Stiffening Of "Empire-Content" Regulations In Britain

British Conservatives want a stiffening of the "Empire-Content" regulations which stipulate the percentage of Empire labor or materials that must be contained in goods entering under the Imperial preference.

The central council of the National Union of Conservative Associations, meeting in London, with 500 delegates present, unanimously passed a resolution demanding the government take steps to amend the regulations, which at present call for an Empire content of 25 per cent.

The resolution complained that at present United States manufacturers are able to use Canada and the Irish Free State as corridors for the export into Britain of goods mainly of United States origin, thus evading the general duties and defeating the object for which they were imposed.

American Railways Hard Hit

Net Loss Of 76 Millions In First Four Months Of Year

A net loss of \$76,439,000 during the first four months of the current year was shown in the net income of the principal Class I steam railways of the country, according to a tabulation of the Interstate Commerce commission based on reports of 164 Class I steam railways. This compares with a net income of \$959,610 for the corresponding period of last year.

The net loss for April amounted to \$20,682,777 compared with a net income of \$2,622,005 for that month in 1931.

Winnipeg Newspaper Union

A CHARMING LITTLE MODEL THIS YOUNG, DAINTY AND VERSATILE

It can be carried out in a great many different fabrics. It all depends upon whether young dainties wish to wear it for parties, best or everyday occasions.

For simple "best," a crepe de chine or chiffon in dainty pale blue, pink or daffodil yellow.

For simple "best," a crepe de chine in light navy blue and white is quite ideal as sketched. The yoke that merges into caplet sleeves in plain navy crepe. It's most graceful.

Style No. 290 is designed for sizes 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 36-inch material with 1 yard of 33-inch contrasting. Red and white polka-dot dainty with plain white, silk green lines with yellow and coral and white checked tissue gingham with plain coral gingham are striking combinations, truly French.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap snug carefully.

Insect Pests Cause Damage

Seed Maggot Destroying Crops In Parts Of Saskatchewan

While the western armies are cleaning up on gardens and wood patches in all parts of Saskatchewan reports of another pest which has not been so prevalent in the past and has destroyed seed grain in many hundreds of acres, are being received. A report that the United States corn borer had been found responsible for losses at Semana was found incorrect. The responsible pest, which has done damage in other sections and within six miles of Saskatoon, is the seed maggot, which destroys the grain before it has a chance to germinate, particularly affecting late sown corn and barley.

Kenneth M. King, in charge of the Dominion Entomological laboratory in Saskatoon, identified the Semana pest which there had cleaned up 95 per cent of the crop in a large field as the seed maggot, known as the seed corn maggot in the United States. There farms have been infested and about 100 acres of crop nipped in the germinating state.

According to Mr. King infested fields are located at Wilkes, Woodrow, Pilot Butte, Colony, Balgonie and Cadillac, and a field six miles east of Saskatoon.

The flies, which are the other life stage of this maggot, belong to a native species that is always fairly abundant, but this is the first time in Saskatchewan that they have been observed causing any serious damage to field crops. Mr. King suggests that rather unusual climatic conditions such as heavy moisture after a long, dry period might have particularly favored the development of the maggot. In the Semana area the heavy damage was done, he says, as many as seven maggots to a single kernel of barley. The western, a branch of the army worm family, resulted from the moth that was extremely prevalent this spring. At Semana one farmer's wife went out for beet greens and found them so completely eaten that one would not have guessed they ever grew in her garden.

Japanese Love Flowers

Chrysanthemum Is Queen and Cherry Blossom King Of All

The Japanese, who are traditionally a flower-loving people, claim that their islands produce 3,200 species of flowers. The white plum blossom tells of the coming of spring, then follow the cherry, wistaria and azalea. Iris, peony, lily, chrysanthemum and the camellia. The cherry is the monarch of all and it is celebrated by fetes and processions. The chrysanthemum, queen, and is on the crest of the Emperor. It has been cultivated for 2,500 years. The Japanese often enrich the roots of wistaria with rice wine. Their peonies are sometimes nine inches across and the 80 varieties, when cared for after cutting, will last three weeks.

Blind Astronomer Retires

The blind astronomer of Yerkes Observatory, Lake Geneva, Wisconsin—Dr. Edwin Hubble—Famous for his knowledge of astrophysics, retired July 1. Dr. Frost has been director of Yerkes Observatory since 1905. Although totally blind for several years, he continued his astronomical work almost without interruption.

Family Serve In Commons

With the retirement of G. Hart, superintendent of the members' cloakrooms in the English House of Commons, recently he completed nearly 30 years' service there. His grand father, grandmother, mother and aunt also served in various positions in Commons.

It's pretty hard to tell what does bring happiness. Poverty and wealth have both failed.

"Don't be ever so doing anything. Be honestly in your own skin." "Do you know his family?" "Yes. They are merely honest people."—Journal American, Paris.

W. N. L. 1934

Queen Alexandra

Unveiling Of A Beautiful Memorial To The Well-Beloved Queen

There was something peculiarly artistic and touching about the unveiling recently, on the grounds of Marlborough House, London, of a beautiful memorial to the well-beloved Queen Alexandra. The sculptor, aged and infirm, who had thrown his whole soul into the work, was received by the King and Queen, by whom he was congratulated on the excellence of his production. Albert Gilbert, who designed and executed the memorial, which consists of figures depicting Faith, Hope and Charity, began the work four years ago. Evidently a temperamental artist, he is reported to have destroyed several of his early designs rather than expose them to public criticism. This was to be the triumph of his career, and he struggled on against illness and disappointment with results achieved. At last he was satisfied, and London is enriched by another splendid example of the sculptor's art.

The occasion recalls the gracious and charming Queen, whose royal patronage shepherded the sculptured group perpetuates. Alexandra was beloved by the British people. As Princess of Wales, and following the death of the Prince Consort, she reigned Queen Victoria of most of the social duties involving upon her shoulders, and in the end she became a familiar and extremely popular figure in the life of the nation. As wife of King Edward VII, she endeared herself to the British people, and the years of her sympathy saw her honored by a sympathetic and admiring people.

When Alexandra, a Danish Princess—"So King's daughter from over the sea"—journeyed to England to become the bride of the Prince Consort, she was greeted with a great outburst of public enthusiasm, well voiced in the "Empress of the North" and "Norman" and "Dan are we, but all of us Danes in our welcome to thee, Alexandra." The unveiling of the memorial fell on the 21st anniversary of the establishment of Alexandra Rose Day, on which so much work is done for philanthropic undertakings which give additional meaning to the poet's further words of greeting: "Welcome here, all things beautiful and sweet; scatter the blossoms under your feet. Break, happy land, into earlier flowers;—make music, O bird, in the new-budded woods!"—Terence Gibbs.

More Employed At Seventy Than Nineteen

Small Per Cent Of Septuagenarians In Canada Not Working

More men of 70 are at work in Canada than people of 19. The septuagenarians of today is occupying the job that a generation ago his grandson would have secured. The young Canadian does not really become a man until he is 28 years of age. At least half have to wait until that time before they are in men's jobs.

These are figures gleaned from the last census and just announced by the Dominion Bureau of Statistics. Censuses show that of those who have reached the 70 mark only 41 per cent were unemployed or on pension. Of those who had reached the age of 19 there were 44 per cent who had not found jobs.

The maximum proportion at any age in men's jobs is during the 40's, when it steadily recedes until the 60's, when only half remain, just as only half had arrived at 28.

Records of the bureau show that the years spent in school by Canadian youth are lengthening.

Not The Same Grub

An Englishman had invited an American friend to visit his shooting box in the Highlands. On the first day they did not have much sport, as the birds were shy, but that did not worry the host, who admired the glorious scenery.

As they stood at the top of a fine mountain, from which they obtained a magnificent view of frowning crags and placid lochs, the sporting host said ecstatically: "Isn't this magnificent? Why, just to stand here makes a man feel like a little grub."

"It does," agreed his guest. "I tell you I've had nothing but a ham sandwich since ten o'clock."

The Acid Test

Salesman—Ladies and gentlemen I have here the famous Resilite comb that will stand any kind of treatment. You can bend it double—you can hit it with a hammer—you can twist it—you can—

Interested Listener—Say, Mister, can you comb your hair with it?

The ruler of the B.B. Berengaria weighs 55 tons.

THEIR LIFE A BOWL OF ROSES

Mrs. Helen Willis Moody (left) and Miss Sarah Palfrey, members of the United States Women's Wightman Cup team, are shown with the famous trophy which they won from John Bull representatives by the narrow margin of four matches to three. An admirer has filled the trophy with roses in a pretty tribute to the racquetists.

How Advertising Pays

New York Merchants Prove Success Depended On It

Back in 1923 there was a general strike in the newspaper trades in New York, embracing every important metropolitan daily printed in English as well as the German and Italian papers. For nearly two weeks only a daily bulletin was issued. This carried no advertising, as there was no room for any. During this period, when advertising was suspended, the merchants of New York sustained losses running into millions and millions. For the first time it was demonstrated that their success was largely dependent upon advertising—that is, if they wanted to do business on a large scale.

During the present depression the companies which have maintained consistent and well directed advertising campaigns have been much more successful than those who started their retrenchment program by cutting down the advertising. Of course even the best advertising and the biggest appropriations cannot sustain the sales of an inferior product, but if the merchandise represents good value, advertising is a vital factor in keeping it moving.

A Fast Growing Town

Meadow Lake, Saskatchewan, Wants More Room For New Comers

Which is the fastest growing town in Saskatchewan? The answer, according to S. Young, provincial director of town planning is Meadow Lake.

Meadow Lake, a town boasting some 100 inhabitants, north of North Battleford, was organized as a village on August 24, 1931. The railway only reached Meadow Lake in 1929. The townsite at present includes two quarter sections of land.

Now the townfolk are talking about opening up a new sub-division in order to make more room for new-comers.

"Which of those two men is the bridegroom?" "The anxious looking one is the bride's father."

Home Address London

United States Fans Has Admirer For John Bull

It is a pompous, choleric old chap at times, and one can find a lot of things to point an accusing finger at his backyard, but he has his points. He does not whine, and he never "wheeches," and without preaching it very much, he has practiced the philosophy of the copybook maxim that honesty is the best policy. The old boy plays. The going has been pretty rough lately, still, when he wanted to borrow dollars last summer, our bankers were glad to accommodate him. They knew their man. Things are a bit easier with him now, and what does he do? Characteristically, he says. He has paid \$150,000,000 of that loan. His name is John Bull, home address, London, England, familiar figure in all the capitals and most of the crossroads of the world, involved in pretty much all the crises of history and somehow or other, contriving to muddle through.—St. Louis Post-Dispatch.

Letters To The Editor

Are Usually Printed Unless Of A Uplifting Nature

There are some people who think that an editor publishes only those letters which agree with editorial opinion of his paper. That is not true.

There is only one thing that suppresses letters in newspapers, and that is the Libel Law. Unsound opinions are slanderous, or statements clearly contrary to the actual facts, all letters are published.

The Radio Issue

The fundamental importance of the radio issue which has been fought out and won for the public at Ottawa has not been adequately understood. It is not a question of whether the greatest single agency for influencing public opinion should be owned and operated by or for commercial interests or by agencies responsible to and controlled by the public's Parliament.

A sing-sing is a kind of African antelope.

An Old Trick

Old Novelty Of Walking On The Ceiling Has Been Revived

The first man ever to walk on a ceiling with feet on the ceiling and head down was young Dan Costello, of Racine, son of the famous circus man. This youngster invented ceiling walking and for one season was the premier attraction of the Cooper & Bailey Show. After that every circus had a ceiling walker, and the novelty soon wore off, for everyone knew what a simple thing it was and how easily it was done.

This act recently was revived by a movie actor in Hollywood, Cal., and it is thought to be something new, which causes many an old man to smile, especially those who remembered the act was recently developed by a Racine born, popcorn George, the Mayberry, Burr Robbins and the Ringlings were the act out in a single season. And they were all Wisconsin circus men.—Milwaukee Journal.

Where The Dollar Goes

Sixty Per Cent Of Income Spent On Food and Clothing

Every dollar the average man spends goes in part to the seller of foodstuffs, clothing and so forth, while another part goes to intangibles or services. The Investors' Syndicate states that 60 per cent of incomes is paid to the former. Ten per cent of people spend a larger proportion of each dollar for goods, the total being in the neighborhood of 66 per cent. More and more, however, they have come to use such valuable, if intangible, services as health, education and recreation facilities. After all, the Investors' Syndicate points out, it is possible for an individual to eat just so much food, and to wear just so much clothing, and to use just so much of shoe leather. The growth of demand for such articles must be limited to the growth of the population. The human wants for amusement and other intangible but nevertheless real values are relatively unlimited.

Receives Book Of Signatures

Ambassador Gibson Honored For Attempt To Build Elbow Canal

Ambassador Hugh S. Gibson received in commemoration of his efforts to save Edith Cavell, the popular nurse from executing during the World War, a book presented on behalf of the women of England.

In his honor, Morocco, it contains the signatures of several thousand women, including such prominent ones as Ellen Terry, the actress.

It was explained that the women had planned to give the volume to him several years ago, but it had been delayed by various causes.

Trans-Canada Highway

Propose To Link Kenora With Port Arthur As The Next Step

Discussing the government road policy, the minister said the next step in the construction of the highway in Ontario would be to link Kenora and Port Arthur. Completion of a highway from Winnipeg to Kenora was labeled with Winnipeg via Kenora and via the United States. A highway at present leads from here to Duluth, Minn.

That Was Different "Mr. Nobbs," commenced the rather timid-looking young man—"er—ah—that is, can—er—I will you?" "Why, yes, my boy, you may have her," said the girl's father.

The young man smiled. "What's this?" Have whom?" he asked.

"My daughter, of course," replied Nobbs. "That's what you mean. You want to marry her, don't you?" "Why, no, sir," said the young man. "I just wanted to know if you could lend me ten pounds."

"Certainly not, sir," said Nobbs sharply. "Why, I hardly know you."

Keeping In Step

A London, Ont., doctor is off to London, England, to tell the Cancer Institute of progress made in the Western University toward solving the mystery of that dread malady. Thus is the New World keeping step with scientific research in the Old.

Fifty-Fifty

A mail order house recently received one of its advertisements placed in a note reading: "Send article—if good, will send check." They replied with, "Send check—if good, will send article."

Soviet Russia led all other countries in the purchase of American industrial machinery last year.

"I am in a desperate fix, and I don't know whom I am to ask to lend me the money."

"You reassure me. I thought you were going to ask me."—Montague, Chatterbox.

Sailings For Hudson Bay

Insurance Rates Now Fixed On An Equitable Basis

Churchill, prairie Canada's ocean gateway to the markets of Europe, will be a world-recognized port "in a very few years," is the opinion of W. H. Harting, Montreal shipping agent.

Already, he said in an interview, insurance rates for the Hudson Bay navigation season are on an equitable basis and will grow progressively lower as the volume of business increases.

Insurance underwriters are quoting lower rates this year than last, when two trial grain shipments were successfully made from Churchill.

More than 1,000,000 bushels of Saskatchewan grain are stored in the old government elevator on Hudson Bay and within a few days this grain will be swelled to the elevator's 2,000,000 bushel capacity. Mr. Harting is confident at least 4,000,000 bushels will be shipped via the northern route this summer.

Definite sailing of the first ship to enter Churchill with commercial cargo was announced by the Montreal agent. The "Pennyworth" is to leave Newcastle-on-Tyne, July 15, making stops at Antwerp and Liverpool before crossing the Atlantic and entering Hudson Straits. It will deliver a mixed cargo at Churchill early in August.

But the "Pennyworth" would be the first of a series of ships. Churchill during August and September if arrangements are completed for shipping 4,000,000 bushels of western grain to Europe via the northern route. At least 16 ships would be used to carry this amount.

Tagging The Birds

Bird-Banding Contributes Much Valuable Scientific Information

Bird-banding has afforded much new and valuable scientific information concerning Canada's native wild birds and any person who finds a wounded bird is requested to help in the advancement of this work by reporting the details to the commissioner, national parks of Canada, Department of the Interior, Ottawa. An interesting fact brought out by a recently reported banding operation is recounted here.

Official band 18227 was placed on a purple finch that was wrecked at New Haven, Connecticut, on March 28, 1928. The finch was sent home with a broken wing, by Miss Blanche Spurr at Deep Brook, Nova Scotia, on July 4, 1931. Miss Spurr took the bird to her home and placed it in a large screened-in porch, where, with care, the finch recovered its power of flight sufficiently to be released on August 16, 1931. As the finch was still wearing the band when it was liberated, it is possible that it may be again reported.

Speaking Of Operations

Speaking of operations—Dr. L. B. Clausen, of St. Paul, veterinarian studying what certain foods do to cows, plans to install a small glass window in the side of one so he can see exactly what goes on inside. "It won't hurt the cow," he said, "and she should get along as well with the window in her side as she does now."

"Porter, can you stop that noise in the corridor?" "I can't sleep."

"Very soon now, sir. The brigade have the fire under control."

"I am in a desperate fix, and I don't know whom I am to ask to lend me the money."

"You reassure me. I thought you were going to ask me."—Montague, Chatterbox.

Tuesday via Lethbridge for their home
in Saskatchewan. Mrs. Jas. Ramsey
made the trip with them as far as
Lethbridge and will spend a short holiday
at that point with Mrs. Macdonald.

MANIFESTO ISSUED BY U.F.A. WOULD ALTER CONDITIONS

A manifesto has been issued by the
U.F.A. offering to meet with other
organizations along political and economic
lines to end disunity and lay
the foundations of a co-operative state
and the following program has been
announced:

1. Nationalization of our financial
and credit system, with a view to the
production of credit and investment
operations, and, in particular, as immediate
steps, we advocate:

(a) The abandonment of the gold
standard in Canada.
(b) A well-considered policy of inflation,
and the devising of means to
make the purchasing power in the
hands of consumers at all times adequate
to acquire the total goods and
service available.

2. Public ownership of public utilities.
3. The acquisition, either by the
state or by the extension of co-operative
enterprises of those facilities and
utilities incidental to the handling and
processing of farm products.

4. Continued effort in and support
of co-operation in all its branches.
5. Measures designed to bring about
a more equitable distribution of wealth
including taxation measures, especially
income and inheritance taxes.

6. Adoption of a national planning
policy.

7. A revision of the constitution of
Canada and a re-defining of the
responsibilities of federal and provincial
authorities, to the end that our
constitution shall be more in harmony
with economic requirements of the age.

8. While adhering to our traditional
belief in free trade between nations,
we emphasize the immediate need of
a re-creating of our tariff policies with
a view to the encouragement of our
export trade and the welfare of the
primary producer and the general consumer.

9. We affirm our belief in a non-party
system of government and the
elimination of the patronage system
and secret campaign funds.
10. A foreign policy designed to secure
international co-operation in
regulating trade, industry and finance
and to promote disarmament and world
peace.

TOWN & COUNTY Personalographs

I. Guttman is a Calgary visitor this
week, going in on Wednesday.

Mr. and Mrs. T. J. Johnson and Betty
returned on Tuesday from a two-week
holiday spent at Red Deer and other
Alberta points.

Mr. and Mrs. Alex Sobyski motored
to Calgary on Wednesday to take in
a day at the Stampede.

Winnie Poxon and Agnes Wise left
Sunday to spend Stampede week in
Calgary.

Const. Moriarty of the R.C.M.P. has
received his new uniform and friends
are admiring the swanky style.

Mr. and Mrs. Torrance and family,
and Mr. and Mrs. Donaldson and daughter
and Mrs. Lou Hay, left on Monday
for Calgary and Banff.

Mr. and Mrs. J. H. Gilphart returned
from a two weeks holiday at the coast
on Saturday night.

Miss Phyllis James left last Thursday
to spend the summer at her home
in Kelowna, B. C.

Mrs. Parker of Edmonton spent a
few days in Carbon visiting at the
home of her parents, Mr. and Mrs. J.
H. Gilphart.

George Treanor returned Thursday
from a holiday at the coast. While in
B.C. George purchased another pure
bred Guernsey cow.

Miss Elsie Rouless arrived from
Kaslo, B.C. last Wednesday and is visiting
with Mr. and Mrs. E.J. Rouless.

Cyril and Wilfred Poxon, and Jas.
Pitblain returned from Edmonton on
Monday evening, after taking in the
tennis championship games at that city.
